TECHNICAL EXPERIENCE

ECHO 360

Sept 2022-Current

Software Engineer II

- Led a team of 4 engineers to architect a Media Details user interface and microservice using React, Scala, and Python, effectively addressing multiple customer requirements and enhancing user experience.
- Spearheaded the migration from a monolithic architecture to a microservices-based system, improving deployment speed and system maintainability.
- Mentored and onboarded junior developers, improving team productivity and accelerating ramp-up time.
- Led high-priority feature development under tight deadlines, directly contributing to \$4M in revenue during a major sales conference.
- Architected a robust file archiving system with React, Scala, and Python, automating redundant file removal and significantly cutting DynamoDB storage costs.
- Acted as the primary contact between development and other departments, streamlining client issue resolution and improving response times.
- Built a comprehensive test suite for EchoVideo's media player using Jest and React Testing Library, achieving a 70% reduction in media player outages and enhancing platform reliability.

Software Engineer

- Developed a distributed caching solution with Redis and Java for JWT token management, ensuring secure LMS integrations with Canvas and Blackboard.
- Enhanced in-browser video capture software by integrating a segmentation model, optimizing GPU utilization to below 25%, and enabling virtual backgrounds for end users.
- Refactored legacy Scala services, improving maintainability, reducing technical debt, and optimizing backend performance.
- Improved front-end performance for React applications, optimizing rendering efficiency and reducing page load times.
- Developed reusable UI components in TypeScript, improving development speed and maintaining design consistency across applications.
- Collaborated with UX designers to enhance accessibility and usability across Echo360's suite of products, ensuring compliance with WCAG standards.

EDUCATION

Western Governor's University

2022

- B.S. Computer Science
- Academic Interest: Human Computer Interaction, Software Engineering, Artificial Intelligence.

SKILLS

- Programming Languages: JavaScript, Java, Scala, Python
- Data: MySQL, DynamoDB, Redis, Postgres
- Frontend: React, NextJS, ViteJS, Tailwind, CSS, Less, CoffeeScript
- Backend: NodeJS, Springboot (Java), Play (Scala), Flask (Python)
